

CLASON POINT MILITARY ACADEMY

“Preparedness”

*That Fits the Boy for Life's Eventualities
Is Provided at this*

CATHOLIC BOARDING AND DAY SCHOOL

THE full, normal development of the boy, neglecting nothing that will enable him to face Life's manifold duties with the confidence and spirit of a true Christian, is realized in the training given at the CLASON POINT MILITARY ACADEMY, now entering upon its thirty-fourth year.

From early morning, at the inspiring notes of “Reveille” to “Taps,” which calls to sound, healthy sleep, the boy is cheerfully and wisely occupied—now at his studies, now at drill, now at play, in all under the constant supervision of the Christian Brothers.

And the old Academy is ideally situated for the healthy outdoor life that the growing boy requires. Centred in a beautiful Park of 110 acres, with Campus, Orchard, Woodland, etc., the beautiful parade ground extending to the very edge of the waters of Long Island Sound, every advantage of the country is afforded, though the location is technically within the limits of New York City.

THE CLASON POINT MILITARY ACADEMY (incorporated under the Board of Regents) prepares the boy for College or Business, West Point or Annapolis. Three departments, Primary, Grammar and High School, enable the student to enter at eight years of age, and continue until prepared for college or business. In the upper forms the studies are carefully grouped for classical, scientific or commercial careers.

The student's health is considered of first importance. The military life keeps the boy at the top of physical efficiency and insures an erect, manly bearing in future years. Athletics carefully supervised, including baseball, handball, football, tennis, golf, cinder track and field sports, boating, swimming, etc., are encouraged. The physical equipment of the Academy is the best. The buildings of brick, stone and steel are large, commodious, well ventilated, heated by steam, lighted by electricity and equipped with all modern conveniences. Pure water is derived from an artesian well, bored 480 feet through solid rock.

34th Year Begins Sept. 13th
